INGREDIENTS

MIX

FILL

A natural liquid soap base, certified by the Soil Association, Ecocert and USDA NOP. Requires the simple addition of certified essential oils for fragrance, and can readily be thickened with salt.

Organic Liquid Castile Soap is fully formulated, cold process, pre-preserved and ready to go. Ideal for manufacturers large or small, hand fill or automate to produce a line of liquid products.

- > A true liquid soap of Organic Vegetable Oil origin-surfactant free
- > Certified by the Soil Association, Ecocert and USDA NOP
- > Allows for the production of a certified organic liquid soap, if the converter/filler has organic certification
- > Has a natural translucent pale yellow colour
- > Requires the addition of certified essential oils for fragrance
- > Readily thickened by the addition of common salt (Sodium Chloride) if required
- > To gain organic certification use salt tablets with no anti-caking agent
- > No Parabens, Mineral Oil compounds, Sulfates (SLS & SLES), PEGS, PPG or DEA

MADE IN ENGLAND

EXAMPLE RECIPE

Here we show you how to simply convert our **Organic Liquid Castile Soap** into a natural handwash.....

Follow the steps below to create a range of tailored Liquid soap products using our innovative Liquid Bases.

- > **Organic Liquid Castile Soap** - Add the desired weight required
- > Add between 0.3/0.5% fragrance / essential oil
- > Mix together for 10-15 minutes until essential oils are dispersed
- > Whilst stirring, add 20% salt solution - Mix until homogeneous and desired viscosity is achieved
- > Fill into your finished packaging

Open - Simply open the packaging and measure your desired amount of Organic Liquid Castile Soap.

Prepare - Make up a 20% salt solution in warm deionised or softened water. Do not add until the final stage.

Add - Add your Essential Oils / Fragrances of your choice to your liquid base. We recommend adding no more 0.5% to the Liquid Castile Soap to maintain clarity.

Mix - Gradually mix the materials together in a suitable container until smooth and homogeneous, approx. 10 - 15 minutes.

Thicken - Now add your 20% salt solution and mix until desired viscosity is reached.

Fill - Once finished, fill into your packaging, bottles, or tubs. (always run full stability testing prior to sale / distribution)

PACKAGING

Liquids are available in a range of packaging, just pick a size that suits your needs:

- > 5KG Jerry Can
- > 25KG Bucket
- > 200KG DRUM
- > 1,000KG IBC / TOTE
